# GRAPHIC FACILITATION

## THE ART OF BRINGING TOGETHER

Graphic facilitation is a **collaborative exercise** that aims to create a **simple visual synthesis of complex concepts**. It is an art that fosters creativity, self-knowledge, team cohesion and innovation.

In August 2020, the philanthropic activities team met for 1 hour, virtually, to reflect and exchange on our daily activities, the way we convey the Foundation's mission, our challenges, our distinctive strengths, and our approach. **A beautiful moment of collective introspection.**

Witnessing these exchanges, Dorothée de Collasson mobilised her incredible talent to **collect** the information shared, **process it and render it live**. With her own graphic style, she skillfully **rendered ideas and emotions tangible** and contributed to a better understanding of our reality.
